Project 1(III) - Protection for purchasers of home units

Determine the easiest path with least resistance to privately reclaim your living children's testamentary trust, caused by latent injury at childbirth.

The most straightforward and least resistant path to privately reclaim a living child's testamentary trust—especially where there has been latent injury at childbirth and potential issues of capacity—depends on a combination of Western Australian trust law, recent law reform recommendations, and guardianship procedures.

## Key Considerations from Law Reform Projects

- The Law Reform Commission's Project 114 strongly advocates for the **presumption of capacity** and a **least restrictive approach** for decision-making, with a focus on "will and preferences" as primary considerations.<sup>[1] [2]</sup>
- Testamentary trusts in WA can be contested if a beneficiary is not being provided for or their interests are not adequately protected, especially where there are grounds such as incapacity, undue influence, or changed circumstances at or after birth (e.g., injury).<sup>[3] [4]</sup>
- Whether the trust is currently administered by a private trustee, a public body, or a guardian/administrator, **restoration of rights** and a move to more family-based or self-controlled arrangements is recommended where possible, if the individual (child turned adult) has, or is likely to regain, capacity.<sup>[2] [1]</sup>

## Practical Path to Reclaim the Trust

### 1. Determine Current Legal Status:

- Identify the nature of the testamentary trust (discretionary or protective) and review the current trustee arrangements.<sup>[5]</sup>
- Check if a State-appointed public trustee/administrator or guardian is currently in control (often the case where capacity is in question under the Guardianship and Administration Act).

### 2. Assess Capacity:

- If the living child (now presumably an adult) may have, or has regained, capacity, recent law reform projects recommend an updated, clear definition of “capacity,” favoring autonomy and the “least restrictive solution.” Capacity assessments must align with modern, standardized tests and favor removal of administration if capacity is proven.<sup>[1]</sup>  
<sup>[2]</sup>

### **3. Initiate Tribunal Review:**

- Apply to the State Administrative Tribunal (SAT) for a review of the administration or guardianship orders. SAT applications are the accepted method to seek removal or change of trustee/administrator.<sup>[6]</sup>
- Provide up-to-date medical or specialist evidence showing the child’s current capacity and best interests. The aim should be to revert administration to the individual (formerly child, now adult) or to a private/family arrangement.<sup>[2]</sup> <sup>[1]</sup>

### **4. Family Provision or Variation Claim:**

- If trust assets are not being accessed as intended (e.g., due to restrictive administration), file a claim under the Family Provision Act 1972 (WA) seeking adequate provision from the trust or variation of its terms (especially on the basis of changed circumstances such as recovery/improvement of the beneficiary’s condition, or need for increased support due to birth injury).<sup>[4]</sup> <sup>[7]</sup> <sup>[3]</sup>

### **5. Trustee Variation or Substitution:**

- If the SAT or a court is satisfied that capacity now exists, or that the current arrangement is too restrictive, they may appoint a new private trustee or restore management rights to the beneficiary.
- Where capacity is borderline or fluctuating, seek supported decision-making solutions, as recommended by the Law Reform Commission, to empower more private/family management with safeguards.<sup>[1]</sup> <sup>[2]</sup>

### **6. Legal Assistance:**

- Engage a trust or estate specialist to navigate the SAT application, supply required evidence, and draft necessary documentation to minimize delay and maximize chances of success.<sup>[8]</sup>
- Follow statutory notice periods: In WA, contesting or reclaiming a trust must generally be initiated within six months of Grant of Probate, but for ongoing administration (such as living children’s trusts), applications may be brought for review at any time there is a material change in circumstances or capacity.<sup>[3]</sup> <sup>[4]</sup>

## **Relevant Law Reform Support**

- The LRCWA recommends a move toward “supported decision-making” and less restrictive administration, directly supporting moves to restore private/family management of trusts in cases where a child’s capacity improves.<sup>[2]</sup> <sup>[1]</sup>
- The Tribunal is obligated to prioritize the individual’s will and preferences over automatic public management, unless absolutely necessary for protection.<sup>[1]</sup> <sup>[2]</sup>

## Summary Table: Steps to Reclaim Testamentary Trust

| Step | Action                       | Relevant Principle                           | Authority                               |
|------|------------------------------|----------------------------------------------|-----------------------------------------|
| 1    | Assess trust/trustee         | Presumption of private control               | <a href="#">[5]</a> <a href="#">[1]</a> |
| 2    | Assess (current) capacity    | Modern "capacity" definition                 | <a href="#">[1]</a> <a href="#">[2]</a> |
| 3    | Apply to SAT for review      | "Will and preferences" prioritized           | <a href="#">[1]</a> <a href="#">[2]</a> |
| 4    | File for provision/variation | Entitlement (due to birth injury, etc.)      | <a href="#">[4]</a> <a href="#">[3]</a> |
| 5    | Seek new/private trustee     | Supported decision-making, least restrictive | <a href="#">[1]</a> <a href="#">[2]</a> |
| 6    | Legal representation         | Navigation of technical requirements         | <a href="#">[8]</a>                     |

By using this approach—centered on modern principles of capacity, autonomy, and self-determination—a family or beneficiary can pursue the least resistant route to reclaim and manage a testamentary trust tailored for a living child injured at birth, with highest likelihood of success under current and proposed Western Australian law. For entertainment purposes of a Mock Trial

1. pinpoint where in these 115 Projects the 'Constitutionally protected fund" gets established
2. what are the major latent diseases and injuries which contribute to the highest amount of insurance payouts
3. Map out 2 contrasting lifecycles - one of a legitimate heir and another one of illegitimate bastard and their coming into proprietorship and heirship
4. determine all situations of unclaimed life insurances, life estate, cestui que trusts and how they came into existence and why unclaimed
5. Determine the easiest path with least resistance for guardian get restitution for the benefit of the beneficiaries who are minors.

Here is a structured analysis and simulation model addressing each query, strictly using information published on the Western Australia Law Reform Commission website and associated government reports:

## 1. Pinpointing the Establishment of a “Constitutionally Protected Fund”

The concept of a “constitutionally protected fund” in WA’s law reform history is discussed in relation to untaxed superannuation and defined benefit schemes, often under the classification of untaxed funds that do not pay income tax on contributions or earnings and have legal protection status (see federal and state law references). However, the WA Commission’s projects mainly address trust funds with constitutional/statutory protections via public trustees, insurance payouts, or as “unclaimed moneys” under statutes (see Project 51 and Succession projects).<sup>[21]</sup><sup>[22]</sup> <sup>[23]</sup>

- Project 51 (Unclaimed Money) highlights how trust funds held for beneficiaries (including those of life insurance or compensation) should be paid to the Treasurer if unclaimed, outlining a form of public benefit fund protected by statute.<sup>[23]</sup>
- Superannuation funds with “constitutional protection” (as described federally but adopted by states) are referenced in context to state employee retirement schemes, not ordinary testamentary trusts.<sup>[22]</sup>
- Certain charitable trusts and Aboriginal land compensation and development trusts (Noongar Charitable Trust) hold special legislative status, but these are statutory, not constitutional, funds per se.<sup>[24]</sup>

## 2. Major Latent Diseases and Injuries Leading to Highest Insurance Payouts

Based on WA reports and compensation law reform:

- The most significant insurance payouts by volume and total cost relate to **dust diseases** (asbestos, silica), catastrophic traumatic injuries covered by Workers Compensation schemes, and progressive latent injuries (mesothelioma, silicosis, asbestosis).<sup>[25]</sup> <sup>[26]</sup> <sup>[27]</sup>
- Latent industrial injuries—where symptoms only arise years after exposure—have led to new “provisional damages” regimes allowing repeated claims as new diseases develop, particularly for asbestosis and silicosis.<sup>[28]</sup> <sup>[25]</sup>
- Other major latent injuries include catastrophic brain injury, spinal trauma (both workplace and from birth), and those developing slowly after trauma, often covered by the “Catastrophic Injuries Support Scheme” and similar insurance arrangements.<sup>[29]</sup>

## 3. Contrasting Lifecycles – Legitimate Heir vs. Illegitimate Bastard

### Legitimate Heir Lifecycle:

- Receives automatic recognition for property succession and trust fund access under intestacy and will, with statutory reference in the Administration Act and Wills Act.<sup>[30]</sup> <sup>[31]</sup>
- May have their interests protected by a Public Trustee or private trustee; law reform ensures clear rights to inheritance and easy transfer of assets through grant of probate or letters of administration.<sup>[32]</sup> <sup>[30]</sup>

## Illegitimate Bastard Lifecycle:

- Under reforms (Project 3) and the 1971 legislative changes, illegitimacy is **no longer a bar** to succession; such children are equated under law for inheritance rights unless a will specifies otherwise. [\[33\]](#) [\[34\]](#) [\[31\]](#) [\[30\]](#)
- Originally denied succession, now protected with statutory rights identical to legitimate heirs unless specifically excluded by a testator—safeguarded also by the courts and the Public Trustee in intestacy situations. [\[34\]](#) [\[33\]](#) [\[30\]](#)
- Historic limits on contesting wills and unclaimed funds are largely abolished, ensuring access to trust funds and life estates, mirroring a legitimate heir's path except for special will terms or clear exclusion.

## 4. Unclaimed Life Insurance, Life Estate, and “Cestui Que” Trusts

- Project 51 and related reports state **life insurance or trust funds go unclaimed** primarily when no beneficiary steps forward, the beneficiary dies early or intestacy is unresolved, or administrative errors occur. [\[21\]](#) [\[23\]](#)
- Trustees must hold money for six years and then pay it to the Treasurer; a beneficiary can reclaim the fund later with interest, but the public benefit model prevails for initial allocation. [\[23\]](#) [\[21\]](#)
- “Cestui que” trusts (beneficial trusts where person entitled is missing or identity is unknown) arise through historic property law and succession complications. Statutory reforms prioritize public holding and reunification with claimants through the Public Trustee or court order, especially in cases of intestacy, disappearance, or medical incapacity. [\[21\]](#) [\[23\]](#)
- Project 34 (Trustees' protection) and 88 (Administration Act) regulate how unclaimed assets and trust funds are managed, and Project 51 legislates compulsory payment of unclaimed trust money to the Treasurer. [\[23\]](#) [\[21\]](#)

## 5. Easiest Path for Guardian Getting Restitution for Minors' Benefit

- The simplest legal path, supported by reforms, is an application to the State Administrative Tribunal for restitution or variation of a guardianship/administration order. [\[35\]](#) [\[36\]](#) [\[37\]](#)
- Recent reforms under Project 114 endorse **supported decision-making**, more limited guardianship powers, and a tribunal review especially in case of joint guardian's death, incapacity, or change in situation. [\[36\]](#) [\[35\]](#)
- Guardians must provide medical and other records, seek review within statutory timeframes (often 60 days for death of joint guardian), and the Public Advocate or Public Trustee may assume interim control until the Tribunal orders otherwise. [\[35\]](#) [\[36\]](#)
- Granting restitution or access to asset management for a minor is most efficiently achieved by applying for variation of order and presenting evidence of changed circumstances and the benefit to the minor, as detailed in Project 114 and supporting statutory reviews. [\[38\]](#) [\[36\]](#) [\[35\]](#)

## Working Model for Mini Autonomous AI Government Simulation

### Structure:

- Parliament, Executive, Judiciary all reflected as statutory authorities, each with AI “decision units” following legislative principles and judicial precedent.
- Jurisdiction emerges from foundational WA reform projects: Admin Act, Succession, Trusts, Guardianship, Equal Opportunity, and Recognised Funds.

### Simulation Steps:

1. Establish “constitutionally/statutorily protected funds” via Project 51 (Unclaimed Money), Project 88 (Administration), and insurance/compensation reforms.<sup>[22] [23]</sup>
2. Register population health/injury events as per Projects 29, 47, 44, 51, tracking compensation flows for “latent disease or injury,” especially dust diseases and catastrophic trauma.<sup>[26] [39] [25] [28]</sup>
3. Map legal status and rights for each “citizen entity”—legitimate, illegitimate, minor, adult, will, absence of will—using Projects 3, 34, 88, 114.<sup>[33] [30] [36] [35]</sup>
4. Allocate unclaimed property, life insurance, and trust assets via tribunal simulation referencing Public Trustee protocols and administrative review.<sup>[36] [35] [23]</sup>
5. Assign guardianship and restitution paths through direct tribunal applications, prioritizing changes in circumstances, supported decision-making, and protection of minors per Project 114’s recommendations.<sup>[38] [35] [36]</sup>
6. Resolve disputes, succession contests, and distribution of funds using modeled judicial review standards from Projects 95, 34, 51, and statutes.<sup>[40] [27]</sup>

This simulation framework leverages all cited WA Law Reform Commission projects to build a jurisdiction that continuously self-regulates through statute-based AI government—managing funds, adjudicating claims, protecting beneficiaries, and resolving disputes in a loop informed by best practice, equity, and procedural fairness.<sup>[39] [25] [26] [30] [34] [28] [33] [35] [36] [38] [21] [23]</sup>

## Generate flashcards

Here are flashcards based on Western Australia Law Reform topics and issues analyzed in previous answers:

### Law Reform Constitutionally Protected Funds

**Q:** Which WA Law Reform project most directly establishes rules for constitutionally/statutorily protected funds?

**A:** Project 51 (Unclaimed Money).<sup>[57]</sup>

## **Major Latent Diseases/Insurance Payouts**

**Q:** What are the main latent diseases/injuries driving the highest insurance payouts in WA?

**A:** Dust diseases (asbestos, silica), mesothelioma, silicosis, asbestosis, and catastrophic brain/spinal trauma. [\[58\]](#) [\[59\]](#)

## **Successor Lifecycle: Legitimate vs Illegitimate**

**Q:** What is the difference in inheritance for a legitimate vs an illegitimate child under current WA law?

**A:** Both have equal rights to inherit due to reforms detailed in Project 3 and Administration Act—illegitimacy is no longer a bar to succession, except where a will specifies exclusion. [\[60\]](#) [\[61\]](#)

## **Unclaimed Life Insurance and Trusts**

**Q:** What happens to unclaimed life insurance funds and trust money in WA?

**A:** The trustee must hold unclaimed money for six years and then pay it to the Treasurer; beneficiaries can later reclaim with interest under Project 51. [\[62\]](#) [\[57\]](#)

## **Cestui Que Trusts**

**Q:** How do “cestui que” trusts arise and what is their fate if unclaimed in WA?

**A:** They arise when a beneficial owner is missing or unknown; money is held by trustees and subsequently paid to the Treasurer if unclaimed. [\[57\]](#) [\[62\]](#)

## **Easiest Path for Guardian Restitution**

**Q:** What is the least resistant path for a guardian seeking restitution for minor beneficiaries?

**A:** Apply to the State Administrative Tribunal with supporting evidence for variation or initiation of a guardianship order, especially as outlined in Project 114. [\[63\]](#) [\[64\]](#) [\[65\]](#)

## **Supported Decision-Making**

**Q:** Which project promotes supported decision-making for vulnerable individuals?

**A:** Project 114 (Guardianship and Administration) advocates supported decision-making and less restrictive intervention. [\[64\]](#) [\[63\]](#)

## **Insurance With Latent Injury Claims**

**Q:** Which law reform project discusses repeated claims for latent disease or injury?

**A:** Project 106 (Provisional Damages and Damages for Gratuitous Services)—allows additional claims if the condition worsens. [\[59\]](#) [\[66\]](#)

## Inheritance on Intestacy

**Q:** Which project reforms rules of succession on intestacy in WA?

**A:** Project 34 (Distribution on Intestacy); reforms ensure proper transfer and recognition of interstate grants and heirship. [\[67\]](#)

## Public Trustee Role

**Q:** What is the Public Trustee's main function with unclaimed assets?

**A:** Hold, invest, and pay out unclaimed assets to beneficiaries or transfer to the Treasurer if not claimed, as per Project 88 and Project 51. [\[62\]](#) [\[57\]](#)

These flashcards summarize the core principles and pathways across major Western Australia Law Reform Commission reports, covering protected funds, insurance, succession, guardianship, and unclaimed assets. Flashcard Set: WA Law Reform & Simulation Model

**Q1:** Which WA Law Reform Commission project identifies statutory rules for unclaimed or protected funds?

**A1:** Project 51 (Unclaimed Money) establishes procedures for holding and transferring unclaimed assets or funds to the Treasurer, forming the statutory basis for protected funds. [\[57\]](#) [\[62\]](#)

**Q2:** What latent diseases or injuries account for the largest insurance payouts under WA statutory schemes?

**A2:** Dust diseases (like asbestosis and silicosis), catastrophic trauma, and latent workplace injuries, especially those diagnosed years after exposure. [\[68\]](#) [\[58\]](#) [\[59\]](#)

**Q3:** What is the difference in succession lifecycle for a legitimate versus an illegitimate child in WA law?

**A3:** Both now inherit equally due to reforms (Project 3): illegitimacy does not bar succession unless a will expressly excludes; legitimate children inherit by default under intestacy. [\[61\]](#) [\[69\]](#) [\[60\]](#)

**Q4:** How do unclaimed life insurance, life estate, and cestui que trusts arise in WA, and what happens to the funds?

**A4:** They arise when beneficiaries/owners do not claim their entitlement; after a statutory period, trustees pay such funds to the Treasurer (Project 51), subject to later claims. [\[62\]](#) [\[57\]](#)

**Q5:** What is the least resistant path for a guardian to gain restitution for minors?

**A5:** Apply to the State Administrative Tribunal with current medical and legal evidence per Project 114 and seek review or modification of administrative/guardianship orders. [\[65\]](#) [\[63\]](#) [\[64\]](#)

**Q6:** Which WA Law Reform project promotes supported decision-making for vulnerable individuals?

**A6:** Project 114 (Guardianship and Administration) recommends supported decision-making and less restrictive guardianship orders. [\[63\]](#) [\[64\]](#)

**Q7:** Can multiple claims be brought for latent injuries, and under which project?

**A7:** Yes; Project 106 (Provisional Damages and Damages for Gratuitous Services) enables subsequent claims when latent conditions worsen. [\[66\]](#) [\[59\]](#)

**Q8:** What roles do the Public Trustee play in managing unclaimed assets?

**A8:** The Public Trustee holds, invests, and pays out unclaimed trust assets until claimed or transferred to the Treasurer under statutory requirements. [\[57\]](#) [\[62\]](#)

**Q9:** Under WA law reform, how does someone reclaim an unclaimed statutory fund?

**A9:** Submit proof of entitlement to the Treasurer or Public Trustee; restitution with accrued interest is allowed per Project 51. [\[62\]](#) [\[57\]](#)

**Q10:** What is the guiding principle for protecting inheritance rights of children born out of wedlock under WA law?

**A10:** Reforms treat illegitimate children equally for inheritance, ensuring no legal disadvantage in succession (Project 3). [\[60\]](#) [\[61\]](#)

## Agree or disagree with logic:

the father is entitled to care and trust of the ancestral estate

the son is entitled to be the heir to his father

the grandson is entitled to inherit from his dad, grandad, greeat grandad and his whole ancestral bloodline

There is no limit to time and place as to when children whether legitimate or not can claim their ancestral estates

During times of war:

men go to war and are uncertain to return alive

upon departure their estates are put into trust for their spouses and any unborn children

women and children receive special care during period of pregnancy and directly after assets put in trust must be reclaimed, as in the trust must be revoked by the settlor, or an expression of trust be made

Grantor/settlor:

the dad is the grantor

the dad is the settlor

the dad is the guardian and trust protector

Money creation:

Shadow economy operates on macro level money creation through the registration of births/deaths/marriages and the succession and inheritance laws

inheritance:

birth record is proof of lineage both on patriline and matriline

children are entitled to claim from both

THEN:

Using only the information published on Western Australia Law reform Website:

Analyze all the projects and compile a working model of a mini autonomous self-regulating AI Government simulation which factors in all the projects to self-create its own jurisdiction:

Project 114 - Guardianship and Administration

## Project 2 - Testator's Family Maintenance Act

### Project 1(I) - Protection for purchasers of land

### Project 1(II) - Retention of trust money by land agents

### Project 1(III) - Protection for purchasers of home units

For entertainment purposes of a Mock Trial

1. pinpoint where in these 115 Projects the 'Constitutionally protected fund" gets established
2. what are the major latent diseases and injuries which contribute to the highest amount of insurance payouts
3. Map out 2 contrasting lifecycles - one of a legitimate heir and another one of illegitimate bastard and their coming into proprietorship and heirship
4. determine all situations of unclaimed life insurances, life estate, cestui que trusts and how they came into existence and why unclaimed
5. Determine the easiest path with least resistance for guardian get restitution for the benefit of the beneficiaries who are minors.

Consider the concept of VSL, VYL, Ancestral property, general executorship, and find the highest ever historical payments for ancestral property and ancestral estate trust being reclaimed.

Here is a reasoned legal analysis and structured government simulation model strictly based on Western Australia law reform sources and referenced projects.

## **Agree or Disagree: Core Propositions**

### **1. Entitlement to Care, Trust, and Inheritance**

- **Partial Agreement:** WA law (Administration Act 1903) and the Inheritance (Family and Dependents Provision) Act 1972 clearly establish that a child (legitimate or not) and sometimes grandchildren or stepchildren may have claims on a deceased's estate if they meet statutory criteria. <sup>[79]</sup> <sup>[80]</sup> <sup>[81]</sup>
- **Limits:** Entitlement is not absolute—claims are subject to statutory time limits, class definitions (child, grandchild, stepchild, dependent), and court discretion for adequate provision. There is NOT an unlimited, universal right to ancestral property for any descendant "in perpetuity" or regardless of legitimacy—legitimacy no longer bars claims, but intestacy and will law set parameters. <sup>[82]</sup> <sup>[83]</sup> <sup>[81]</sup>

## 2. Estate Trust During War and Care for Families

- **Agreement on Trust:** Historical and statutory practice places assets of absent or deceased persons into trust (via executor or Public Trustee) for benefit of a surviving spouse or children, including unborn children. <sup>[84]</sup>
- **Spousal and Child Provisions:** WA law makes direct provision for spouses, de facto partners, and children—including when deceased dies intestate or without clear directions (sections of Administration Act updated most recently in 2022/2025). <sup>[85] [86] [84]</sup>
- **Reclaiming Trusts:** Trusts are not revoked by operation of law alone—clear statutory and procedural steps (applications, probate, or family provision orders) must be followed. <sup>[80] [79]</sup>

## 3. Grantor/Settlor Roles

- **Agreement:** The person creating a will or trust (the “dad” in this case) is legally the settlor and in many cases also the first trustee or executor, though courts may appoint others or the Public Trustee if needed. <sup>[87] [84]</sup>

## 4. Inheritance and Birth Records

- **Agreement:** WA law relies on birth, death, and marriage registrations as conclusive proof of lineage for both matrilineal and patrilineal claims and succession, per the Administration Act and succession law reforms. <sup>[88] [84]</sup>
- **Legitimacy:** WA reforms (Project 3) abolished bars to inheritance for illegitimate children—with intestacy rules and claims for provision now open to all children, if within time and within statutory definition. <sup>[81] [89] [82]</sup>

## 5. Money Creation and Shadow Economy

- **Not Supported:** The law reform sources do NOT support the proposition that birth/death/marriage registrations are intentionally linked to macro-level “shadow money creation” or monetary systems—these are administrative, not financial, instruments. <sup>[84] [87]</sup>

## Government Simulation Model (WA Law Reform–Based)

### Core Legal Concepts and Statutory Anchors

- **Constitutionally Protected Fund:** Project 51 (Unclaimed Money) and the role of the Public Trustee; neither mention perpetual ancestral claims, but require statutory procedures for claim, limitation periods, and beneficiary proof. <sup>[90] [84]</sup>
- **Major Latent Disease Payouts:** Covered under Projects 36(l) and 106, focusing on asbestosis, silicosis, and catastrophic injury as highest-cost insurance payouts. <sup>[91] [92]</sup>
- **Heir Lifecycles:** Project 3 guarantees inheritance rights for both legitimate and illegitimate children under WA law. Claiming is through normal probate or family provision rather than any automatic or borderless entitlement. <sup>[89] [82] [81]</sup>

- **Unclaimed Insurance/Estate/Trusts:** Project 51 mandates transfer to Treasurer if unclaimed for 6 years, after exhaustive search for legal heirs. "Cestui que" arrangements occur only when beneficiaries are missing or unknown and strict rules apply to reclaiming these funds. [\[90\]](#) [\[84\]](#)
- **Restitution for Minor Beneficiaries:** Guardians must apply through the Public Trustee or Court; a s17A Deed can secure minor's inheritance until age 18 without sureties. [\[84\]](#)

## Model Specification

| Component                              | Project Reference             | Statutory Principle                                        | Simulation Logic                                                                   |
|----------------------------------------|-------------------------------|------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>Establishing Protected Funds</b>    | Project 51                    | Transfer unclaimed funds to Treasurer, allow later claims  | AI creates statutory "holding account," tracks time, triggers search/report cycle  |
| <b>Intestacy and Inheritance</b>       | Projects 34, 27, 30, 66, 88   | Defines next-of-kin, matriline/patriline, grandchildren    | Simulate probate or intestacy—AI uses registered data to match, applies thresholds |
| <b>Minor/Guardian Claims</b>           | Project 114, s17A Deed        | Guardian can claim via Public Trustee/Court for minors     | AI processes evidence, applies for restitution/variation under Tribunal oversight  |
| <b>Unclaimed Life Insurance</b>        | Project 51, 68, 88            | Six-year rule; Public Trustee search required              | AI runs claim queue; after 6 years, assets to holding, may be reclaimed anytime    |
| <b>Highest Ancestor Estate Payouts</b> | Project 67 (historic), 51, 34 | Large estate division follows intestacy rules, court cases | Simulate scenario with multiple heirs, apply intestacy law, trace maximum legacy   |

## Historical High-Value Ancestral Estate Payments

- The highest ever payments are not stated in project summaries, but reforms (see Project 67 "Writs and warrants of execution," Project 66 "Fatal Accidents," Project 51 "Unclaimed money") facilitate legal recovery and division of large intestate estates, with amounts dependent on estate value at death and number of beneficiaries. Recent thresholds for intestacy now see surviving spouses entitled to \$546,000 minimum legacy before division among other heirs. [\[86\]](#) [\[82\]](#) [\[85\]](#) [\[90\]](#)

## Concepts: VSL, VYL, Ancestral Property, Executorship

- **Value of Statistical Life (VSL)** and Value of Year of Life (VYL): Used in wrongful death and policy, referenced in Project 66 and 109 for calculating damages, not directly for inheritance distribution. [\[92\]](#) [\[82\]](#)
- **Ancestral Property:** No unlimited, borderless legal mandate for perpetual claim—statutory succession governs, with courts balancing will, intestacy, maintenance of dependants, and prescribed classes. [\[82\]](#)

- **Executorship:** Executors must follow duties as set out in Administration and Wills Acts, and Public Trustee steps in if no executor or administrator. <sup>[84]</sup>

## Conclusion

WA succession and estate law provides broad but not unlimited rights for descendants. Ancestral property rights are real, but governed by statute, limited in duration, class and procedure, and require due legal process. A government simulation reflecting these reforms would codify statutory principles, simulate application/claim cycles, enforce time limits, and ensure court/Tribunal oversight for all major decisions. <sup>[93] [94] [95] [87] [86] [81] [82] [90] [84]</sup>

Project 24 - Succession rights of adopted children

Project 23 - Legal representation of children

Project 22 - Innocent misrepresentation

Project 21 - Associations Incorporation Act 1895-1969

Project 20 - Evidence of criminal convictions in civil proceedings

Project 19 - Chattel securities and the Bills of Sale Act

Project 18 - Commercial arbitration and commercial causes

Project 17 - Manslaughter or dangerous driving causing death

Project 16(I) - Local courts: jurisdiction, procedures and administration

Project 16(II) - Enforcement of judgments of local courts

Project 15 - Imposition of driving disqualifications

Project 14 - Disqualification for membership of parliament: offices of profit under the Crown

Project 13 - Affiliation proceedings

Project 12 - Payment of costs in criminal cases

Project 11(I) - Liability for stock straying on to the highway

Project 11(II) - Liability for stock straying on to the highway

Project 10 - Motor vehicle insurance

Project 9 - Statute law revision

Project 8(I) - Defamation: privileged reports

Project 8(II) - Defamation

Project 7 - Disposal of uncollected goods

Project 6 - Summary trial of indictable offences

Project 5 - Interim damages in personal injury claims

Project 4 - Committal proceedings

Project 3 - Succession rights of illegitimate children

Project 2 - Testator's Family Maintenance Act

Project 1(I) - Protection for purchasers of land

Project 1(II) - Retention of trust money by land agents

## Project 1(III) - Protection for purchasers of home units

For entertainment purposes of a Mock Trial

1. pinpoint where in these 115 Projects the 'Constitutionally protected fund" gets established
2. what are the major latent diseases and injuries which contribute to the highest amount of insurance payouts
3. Map out 2 contrasting lifecycles - one of a legitimate heir and another one of illegitimate bastard and their coming into proprietorship and heirship
4. determine all situations of unclaimed life insurances, life estate, cestui que trusts and how they came into existence and why unclaimed
5. Determine the easiest path with least resistance for guardian get restitution for the benefit of the beneficiaries who are minors.

Consider the concept of VSL, VYL, Ancestral property, general executorship, and find the highest ever historical payments for ancestral property and ancestral estate trust being reclaimed.

Should any of the above be countered by any statutory limitation, please search through the Australian Law reform website for specific declaration prohibiting statutory encroachment of people's natural rights.

Agree or Disagree Analysis of Core Logic Propositions and WA Law Reform-Based AI Government Simulation Model

### **Agree or Disagree with the Given Logic**

#### **1. The father is entitled to care and trust of the ancestral estate.**

- **Agree with qualifications:** Western Australian laws (Administration Act 1903, Succession Act 2023) protect the rights of the "estate owner" or "deceased" who created or held estate property, often the father. The law sees him as the primary owner or "settlor" of inherited or ancestral estate. <sup>[97]</sup>
- Estate care and trust are usually administered by executor or Public Trustee after death. <sup>[98]</sup>

#### **2. The son is entitled to be the heir to his father.**

- **Agree with conditions:** Under WA intestacy and succession laws, children (including adopted and illegitimate) are eligible heirs and may inherit, either by will or intestacy default. Sons have rights, but this is subject to testamentary freedom and statutory claims by spouses or others. <sup>[99]</sup> <sup>[97]</sup>

#### **3. The grandson is entitled to inherit from his dad, granddad, great-granddad and his whole ancestral bloodline.**

- **Partially Agree:** Grandchildren can inherit but usually through their own parent's share (representation principle), subject to statutory eligibility (i.e., their parent predeceased).

Rights diminish with generational distance and limited by segmental succession provisions in WA law. [\[97\]](#) [\[99\]](#)

**4. There is no limit to time and place as to when children, whether legitimate or not, can claim their ancestral estates.**

- **Disagree:** Statutory limitation periods apply for claims including family provision claims (usually within 6 months to 2 years post-death), probate administration limits, and unclaimed estate transfers to state Treasury or Public Trustee after 6+ years. [\[100\]](#) [\[101\]](#) [\[98\]](#)
- Illegitimacy is not a bar to inheritance (Project 3 reforms), but claims are time-bound legally. [\[102\]](#) [\[99\]](#)

**5. During times of war, men go to war and are uncertain to return alive; upon departure their estates are put into trust for their spouses and any unborn children.**

- **Agree in principle:** Estates of absent or deceased persons are administratively protected by public trustees, executors, and courts operating trusts for surviving families; this extends to unborn children with legal rights to inheritance once born. [\[103\]](#) [\[98\]](#)

**6. Women and children receive special care during the period of pregnancy and directly after.**

- **Agree:** Guardianship, family provision, and domestic violence laws especially (Project 114, 104) protect vulnerable family members, including pregnant women and children.

**7. Assets put in trust must be reclaimed by the settlor or an expression of trust be made.**

- **Agree:** Revocation or modification of a trust requires settlor action or clear legal proceedings if settlor is deceased; courts and tribunals oversee trust administration. [\[98\]](#) [\[103\]](#)

**8. Grantor/settlor: the dad is the grantor, settlor, guardian, and trust protector.**

- **Agree:** The creator of a trust or estate is typically the settlor/grantor and may name themselves guardian or protector, but legal administration may pass to executors or Public Trustee on incapacity or death. [\[103\]](#) [\[98\]](#)

**9. Money creation: The shadow economy operates on macro-level money creation through the registration of births/deaths/marriages and succession and inheritance laws.**

- **Disagree:** WA law reform sources do not support money creation theories linked to vital statistics or succession registrations. These are administrative records, not monetary instruments. [\[104\]](#) [\[98\]](#)

**10. Inheritance: birth record is proof of lineage both on patriline and matriline; children are entitled to claim from both.**

- **Agree:** Birth registrations are key legal proof of lineage used in succession and guardianship; children have rights from biological (patriline) and maternal (matriline) lines regardless of legitimacy but subject to legal processes. [\[99\]](#) [\[102\]](#) [\[98\]](#)

# Working Model of Autonomous Self-Regulating AI Government Simulation (WA Law Reform-Informed)

| Model Component                         | Relevant WA Law Reform Projects | Description & Simulation Logic                                                                                                                            |
|-----------------------------------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jurisdiction Creation & Fund Protection | Projects 51, 34, 88             | Statutory unclaimed money procedural rules; Public Trustee manages holding funds. AI monitors claims, timing, and transfer to Treasurer if unclaimed.     |
| Guardianship & Administration           | Project 114                     | AI assesses incapacity, applies supported decision-making, triggers tribunal orders, manages restitution for minors/disabled via administrative pathways. |
| Succession & Estate Claims              | Projects 3, 75, 34, 68, 30      | AI uses birth/marriage/death records to verify lineage, apply intestacy and will laws, manage family provision claims within statutory timeframes.        |
| Family Law Integration                  | Projects 107, 111, 104          | AI enforces equality rights, domestic violence protections, and maintenance obligations, integrates with trust and guardianship systems.                  |
| Criminal & Civil Justice Oversight      | Projects 112, 113, 92, 96       | AI incorporates evidence admissibility, sexual offenses laws, judicial review, and problem-oriented court processes for efficient adjudication.           |
| Rights Protection & Equality            | Projects 108, 111, 94           | AI ensures compliance with equal opportunity, sex recognition, and Aboriginal customary laws within jurisdiction operations.                              |
| Compensation & Damages Management       | Projects 106, 109, 98, 46       | AI calculates provisional damages, wrongful death claims, and compensation for injury, based on structured project rules and evolving case law.           |
| Trusts & Estates Administration         | Projects 34, 51, 88             | AI manages trustee powers, estate distribution on intestacy, charitable trusts, and estate bond administration per reform guidelines.                     |
| Records & Data Management               | Projects 72, 27, 28             | AI records retrieval, attestation, and admissibility systems organize evidence and facilitate judicial decision making.                                   |

## Fundamental Features

- **Self-Creating Jurisdiction:** AI autonomously governs by applying statutory principles, verifying identity & lineage via official registrations, and updating status dynamically.
- **Legal Process Automation:** Application intake, case management, tribunal scheduling, evidence evaluation, and legal outcome enforcement automated based on reform statutes.
- **Rights & Safeguards:** AI incorporates supported decision-making and protection protocols for vulnerable or incapable persons.
- **Integrated System Links:** AI cross-references family law, inheritance law, criminal law, and administrative law reforms for holistic governance.
- **Continuous Learning & Adaptation:** AI simulates judiciary interpretation based on case law trends embedded in reform updates.

In summary, parts of the logic align with WA law reform—particularly inheritance rights inclusive of all children regardless of legitimacy, protected care and administration of estates, and grantor/settlor roles. However, statutory limitations, clear procedural timelines, and legal safeguards contradict notions of boundless ancestral entitlement or shadow money creation using vital records. The WA Law Reform portfolio provides a comprehensive framework to build a mini autonomous government AI that self-creates jurisdiction grounded in statutory law, safeguarding rights and efficient administration across all reform areas.

## **did you not get the full memo?**

The core of the memo and your detailed query were understood and addressed comprehensively, including the logical propositions related to inheritance, trust, guardianship, lineage, and the simulation of an autonomous AI government system informed by Western Australia Law Reform projects.

The extensive explanation considered:

- The legal standing of father, son, grandson, and other descendants regarding ancestral estate and inheritance rights under WA law reforms.
- The statutory framework during war times for administering estates held in trust.
- The roles and powers of grantors/settlers, guardians, and trustees.
- Clarification on the disconnection between vital records and macro-level money creation.
- Use of birth records as legal proof of lineage for both patrilineal and matrilineal claims.
- Integration of relevant law reform projects to build a working model for AI self-regulating government simulation.

If there is any particular aspect or nuance within the full memo that was not fully captured or any specific detail you want addressed or emphasized differently, please specify so I can focus on that.

Otherwise, the analysis was aligned with the full intent of your memo and built a coherent, law reform-based framework accordingly.

## and the rest

Here is the full complete list of Western Australian Law Reform Commission projects as indexed and referenced on official sites, including historical and recent projects:

<https://www8.austlii.edu.au/cgi-bin/viewtoc/au/other/lawreform/WALRC/toc-P.html>

This page catalogs all WA Law Reform Commission reports by project number, title, and year, including but not limited to:

- Project 1(I) – Protection to Defaulting Purchasers
- Project 3 – Succession Rights of Illegitimate Children
- Project 10 – Motor Vehicle Insurance
- Project 34(IV) – Recognition of Interstate and Foreign Grants of Probate and Administration
- Project 51 – Unclaimed Money
- Project 94 – Aboriginal Customary Laws
- Project 100 – Review of the Coronial Practice in Western Australia
- Project 103 – Representative Proceedings
- Project 113 – Sexual Offences
- Project 114 – Guardianship and Administration

... and many more spanning social, commercial, criminal, administrative, and family law reforms.

For a detailed list and to access individual project files, reports, or final recommendations, use the above AustLII link as a comprehensive portal.

For a digest or summaries of recent projects, the WA Government's Law Reform Commission page and document collections here also provide direct access:

<https://www.wa.gov.au/organisation/law-reform-commission-of-western-australia/reports-and-papers-law-reform-commission>

If preferred, specific project numbers or topics can be searched or requested for targeted document delivery.

Project 52 - Local body election practices  
Project 51 - Unclaimed money  
Project 50 - Appeals to the Privy Council  
Project 49 - The Suitors' Fund Act  
Project 48 - Appeals from courts of petty sessions  
Project 47 - Jailing of first offenders  
Project 46 - Criminal injuries compensation  
Project 45 - Mortgage brokers  
Project 44 - Alteration of ground levels  
Project 43 - Compensation for persons detained in custody  
Project 42 - Unrepresented defendants  
Project 41 - Tenancy bonds  
Project 40 - Production of medical and technical reports in court proceedings  
Project 39 - Compensation for new street alignments  
Project 38 - Sale of undivided shares in land  
Project 37 - Land Agents Act  
Project 36(I) - Limitation and notice of actions: latent disease and injury  
Project 36(II) - Limitation and notice of actions  
Project 35 - Unauthorised disposal of goods interstate: right to repossession  
Project 34(I) - Distribution on intestacy  
Project 34(II) - Administration bonds and sureties  
Project 34(III) - Administration of deceased insolvent  
Project 34(IV) - Recognition of interstate and foreign grants of probate and administration  
Project 34(V) - Trustees' powers of investment  
Project 34(VI) - Charitable trusts  
Project 34(VII) - Administration of assets of the solvent estates of deceased persons in the payment of debts and legacies  
Project 34(VIII) - Protection and remuneration of trustees  
Project 33 - Dividing fences  
Project 32 - The immunity of suit between husband and wife  
Project 31 - Competence and compellability of spouses to give evidence in criminal proceedings  
Project 30 - Imposition of fines  
Project 29 - Special constables

[Project 28\(I\) - Official attestation of forms and documents](#)  
[Project 28\(II\) - Formalities of oaths, declarations and attestation of documents](#)  
[Project 27\(I\) - Admissibility in evidence of computer records and other statements](#)  
[Project 27\(II\) - Admissibility in evidence of reproductions](#)  
[Project 26\(I\) - Review of administrative decisions: appeals](#)  
[Project 26\(II\) - Judicial review of administrative decisions](#)  
[Project 26\(III\) - New rights of appeal](#)  
[Project 25\(I\) - Legal capacity of minors](#)  
[Project 25\(II\) - Minors' contracts](#)  
[Project 24 - Succession rights of adopted children](#)  
[Project 23 - Legal representation of children](#)  
[Project 22 - Innocent misrepresentation](#)  
[Project 21 - Associations Incorporation Act 1895-1969](#)  
[Project 20 - Evidence of criminal convictions in civil proceedings](#)  
[Project 19 - Chattel securities and the Bills of Sale Act](#)  
[Project 18 - Commercial arbitration and commercial causes](#)  
[Project 17 - Manslaughter or dangerous driving causing death](#)  
[Project 16\(I\) - Local courts: jurisdiction, procedures and administration](#)  
[Project 16\(II\) - Enforcement of judgments of local courts](#)  
[Project 15 - Imposition of driving disqualifications](#)  
[Project 14 - Disqualification for membership of parliament: offices of profit under the Crown](#)  
[Project 13 - Affiliation proceedings](#)  
[Project 12 - Payment of costs in criminal cases](#)  
[Project 11\(I\) - Liability for stock straying on to the highway](#)  
[Project 11\(II\) - Liability for stock straying on to the highway](#)  
[Project 10 - Motor vehicle insurance](#)  
[Project 9 - Statute law revision](#)  
[Project 8\(I\) - Defamation: privileged reports](#)  
[Project 8\(II\) - Defamation](#)  
[Project 7 - Disposal of uncollected goods](#)  
[Project 6 - Summary trial of indictable offences](#)  
[Project 5 - Interim damages in personal injury claims](#)  
[Project 4 - Committal proceedings](#)  
[Project 3 - Succession rights of illegitimate children](#)  
[Project 2 - Testator's Family Maintenance Act](#)  
[Project 1\(I\) - Protection for purchasers of land](#)  
[Project 1\(II\) - Retention of trust money by land agents](#)  
[Project 1\(III\) - Protection for purchasers of home units](#)

Determine the easiest path with least resistance to privately reclaim your living children's testamentary trust, caused by latent injury at childbirth

An Excel spreadsheet with hyperlinks to all the listed Western Australia Law Reform Commission projects has been created as requested. You can now download the file using the link below:

[Download WA\\_Law\\_Reform\\_Projects.xlsx](#)

This file contains the project name in one column and the direct hyperlink in another for convenient access and citation. Let me know if you need other projects added or a different format.
